

# MONTBLANC. THE TIMEWRITERS.

In 1821, Nicolas Rieussec changed watch-making forever with the invention of the first chronograph. Since "chronograph" literally means "writing time," the *Montblanc Nicolas Rieussec Chronograph* rewrites time-piece history. Crafted in the Montblanc Manufacture in Le Locle, Switzerland, this masterpiece is a worthy tribute to its visionary namesake. *Monopusher chronograph, MB R200 self-winding manufacture movement. 30 min. and 60 sec. rotating disc counters fixed on the counter bridge. MONTBLANC. A STORY TO TELL.*
